Charging Meter
1. Remove the USB cap to reveal the USB connector.

The CONTOUR NEXT LINK 2.4 meter has a permanent rechargeable battery. Charge your meter with the wall charger* or by plugging the USB connector into a computer. Be sure the computer is turned on.

Your meter will briefly display “Do Not Test-Charging” and the test strip port light will flash. You cannot do a blood glucose test while the battery is charging. When charging is finished, the test strip port light will turn off. Unplug your CONTOUR NEXT LINK 2.4 meter to test.

Unplug Meter From Charging Source Before Beginning Setup
2. To begin setup, hold down the top menu button for several seconds until the meter turns on.
3. Scroll down to select your language. Press OK.
4. Press OK if the correct language is displayed. Press NO if the incorrect language is displayed.

Connect to Pump
5. For the MiniMed 630G
   a. Press any button to turn the screen on.
   b. Press the Menu button. If your pump does not have a Menu button, go to step 7b.
   OR
   c. For the MiniMed 670G
      7. Press the Select button. Use the Down arrow button to scroll to Options. Press Select button.

If pump screen goes blank, press any button to turn it back on.
6. Press the Down arrow button to scroll to Utilities. Press Select button.
7. In the Utilities menu, use the down arrow to scroll to Device Options. Press the Select button.
8. In the Device Options menu, scroll to Connect Device. Press the Select button.
9. Place the meter and pump next to each other. Select Auto Connect on your pump.

NOTE: Check the units of measure of your meter. See your meter user guide for complete instructions.

Initial Setup of CONTOUR NEXT LINK 2.4 Meter and Connection to MiniMed™ Insulin Pump

10. Press the Select button to select BOLUS.
11. Read the pump screen, using the down arrow to scroll to the next page.

   Use the arrow buttons to scroll to Continue. Press the Select button.

12. Place the meter and pump next to each other. Select Search on the pump.
   The search may take up to 2 minutes.

13. Check to see if Device SN (serial number) on the pump matches the Device SN on the meter.

   If they match, scroll to Confirm on the pump. Press the Select button.

14. Scroll to the next page. When the pump links to the meter, the SN on the meter screen will change to a different serial number. This number is the pump SN.

15. Select Always and press OK on next screen.

16. Select the Date Format.

17. Press OK. Note: If time and date are incorrect, you must change them on the pump.

18. Press Accept to select BOLUS is OFF.

   AutoLog allows you to mark a test result as Fasting, Before Meal, or After Meal. See your user guide to learn more.

   Turn the page over to complete setup.

*Wall charger may not be included in all meter kits. Contact Customer Service for information on obtaining a wall charger.
NOTE: Alerts can only be set outside your selected Target Range(s). Targets can only be set inside your selected Alert level(s). For additional information, you may contact Customer Service. See contact information for Customer Service below.

Your system setup is now complete and ready to run a blood sugar test. Go to Step 1 below.

Materials for Testing

<table>
<thead>
<tr>
<th>Test Strip</th>
<th>Lancet</th>
<th>Lancing Device</th>
</tr>
</thead>
</table>

Testing Your Blood

**Obtain Blood Drop**

1. Insert the test strip and wait for the APPLY BLOOD message.
2. Remove the lancing device endcap. Insert the lancet firmly into the lancing device until it comes to a full stop.
3. Replace the endcap. Rotate the endcap dial to adjust the puncture depth.
4. Obtain your blood drop.

**Testing Blood Drop**

5. Touch the tip of the test strip to the drop of blood. If the first blood drop is not enough, the meter will beep twice and display STRIP UNDERFILLED. You have about 30 seconds to apply more blood to the same strip.

NOTE: If AutoLog is ON, you are asked to mark your result as Fasting, Before Meal, or After Meal before your result displays. If your result is above your High Alert setting or below your Low Alert setting, you will see your result without having to make an AutoLog selection.

Sending Results to Your MiniMed Pump

6. If Always was selected in Send Options during Setup, results will be sent directly to your pump. If Ask Me was selected in Send Options during Setup, you can choose to send your result to your pump after each blood sugar test.

7. Select Bolus to send a bolus to your pump. Select Reminder to set a reminder for your next test. Select Notes to add more information to the result.

Confirm That Result Was Sent to Pump

8. Pick up your pump. Press and hold the Back button to get to the home screen. Your blood sugar result should display on the pump screen.

Turn Meter Off

9. Remove the test strip and the meter will turn off in 3 minutes. Or hold down the Menu button to turn off the meter.

See your CONTOUR NEXT LINK 2.4 user guide, lancing device insert and MiniMed pump user guide for full instructions.

WARNING:

- The lancing device is intended for self-testing by a single patient. It must not be used on more than one person due to the risk of infection.
- Use a new lancet each time you test because it is no longer sterile after use.
- All parts of the kit are considered biohazardous and can potentially transmit infectious diseases, even after you have performed cleaning and disinfection.
- Always wash your hands well with soap and water before and after testing, handling the meter, lancing device, or test strips.

For complete instructions on cleaning and disinfecting your meter, please see your meter user guide.
